Final year Computer Engineering student passionate about Data analysis, AI, and cloud-based solutions. Skilled in Excel, Power BI, SQL, and Python programming for managing large datasets, automating tasks, and building scalable ML models and APIs.

EDUCATION

Near East University Nicosia, North Cyprus **Sep. 2021 – Present**
Bachelor's Degree - **Computer Engineering** - Expected Graduation: June 2026 **GPA: 3.0 / 4.0**
Relevant coursework: AI, Data Structures and Algorithms, Operating Systems, Database Management

EXPERIENCE

Artificial Intelligence Intern | Multilingual Text to Speech Engine **Jan. 2025 – Mar. 2025**
Near East University - AI Research Department, Nicosia, North Cyprus - On Site

- **Developed, deployed, and tested a multilingual Text-to-Speech (TTS) engine in Python** using **Flask**, integrating **gTTS** and **Microsoft Edge TTS**, with support for EN, DE, RUS, AR and TR, supporting 20,000+ students on the university's AI platform.
- Designed **3 robust APIs** with real-time audio **streaming, multithreading, and dynamic chunk-based text processing**, reducing TTS request latency by **over 60%** (3.4 seconds to 1.1).

Data Analyst & Collaboration Assistant **Aug. 2023 - Mar. 2024**
Moonbase (Canada) Dev Team & Web3 Auditing - Remote

- Structured 20,000+ data records with 99% accuracy to support reporting and decision-making.
- Designed version-controlled Excel dashboards to improve collaboration and data tracking.
- Used JIRA and Git in Agile workflows to reduce data errors and team miscommunication by 30%.

PROJECTS

Business Intelligence Intern | Power BI Sales Dashboard **Apr. 2025 – Present**

- Analyzed 12 months of sales data (10K+ records) across 5 product categories.
- Cleaned and transformed data using Power Query and DAX.
- Built KPIs for revenue, profit margin, AOV, conversion rate, and regional customer segmentation.

Discord | Community Bot Developer **Nov 2024 - Present**

- Developed Python-based Discord bot managing **5,000+** users that **automated moderation**, reducing manual interventions by **70%** and improving response time by **85%**.
- Integrated OpenAI GPT API for AI-powered contextual replies, enhancing user engagement and support accuracy. Built structured command handling and integrated APIs to boost functionality.

SKILLS

Programming: Python, SQL

Technical: Data Structures, Data Cleaning, Model Evaluation, Feature Engineering

Tools: Flask, Git, Power BI, Microsoft Excel, MS Word, Microsoft Azure, MS 365 Suite, Adobe Acrobat

Platforms: Windows, macOS
